

# **Student Answer Sheet**

Subject: Artificial Intelligence

## **Definition:**

AI is making computers do intelligent things like humans. It can learn from data and make decisions. AI is used in many applications today.

## **Body:**

Machine Learning and Deep Learning are types of AI. NLP handles language understanding. AI is used in hospitals for diagnosis and in banks for fraud. Self-driving cars also use AI technology.

## **Conclusion:**

AI is very important today. It has benefits but also has ethical problems like privacy and bias. We should develop AI responsibly.
