

Student Answer Sheet

Subject: Artificial Intelligence

Definition:

Artificial Intelligence is the simulation of human intelligence in machines covering learning, reasoning, and self-correction. It enables speech recognition, visual perception, and decision-making. AI subfields include Machine Learning (learning from data), Deep Learning (neural networks), NLP (language processing), and Computer Vision (image analysis). Supervised, unsupervised, and reinforcement learning are key techniques. AI is used in healthcare diagnostics, financial fraud detection, and autonomous vehicles. While transformative, AI raises ethical concerns about privacy, bias, and job displacement requiring transparent, responsible development.

Body:

Artificial Intelligence is the simulation of human intelligence in machines covering learning, reasoning, and self-correction. It enables speech recognition, visual perception, and decision-making. AI subfields include Machine Learning (learning from data), Deep Learning (neural networks), NLP (language processing), and Computer Vision (image analysis). Supervised, unsupervised, and reinforcement learning are key techniques. AI is used in healthcare diagnostics, financial fraud detection, and autonomous vehicles. While transformative, AI raises ethical concerns about privacy, bias, and job displacement requiring transparent, responsible development.

Conclusion:

Artificial Intelligence is the simulation of human intelligence in machines covering learning, reasoning, and self-correction. It enables speech recognition, visual perception, and decision-making. AI subfields include Machine Learning (learning from data), Deep Learning (neural networks), NLP (language processing), and Computer Vision (image analysis). Supervised, unsupervised, and reinforcement learning are key techniques. AI is used in healthcare diagnostics, financial fraud detection, and autonomous vehicles. While transformative, AI raises ethical concerns about privacy, bias, and job displacement requiring transparent, responsible development.
