

Student Answer Sheet

Subject: Artificial Intelligence

Definition:

AI artificial intelligence machine learning deep learning neural network learning reasoning self-correction intelligence machines computer intelligence artificial system AI intelligence learning AI machines learning artificial intelligence AI AI AI machine learning deep learning neural network AI systems.

Body:

Machine learning AI deep learning neural network NLP natural language processing computer vision reinforcement learning supervised learning unsupervised learning AI machine learning deep learning AI neural networks NLP computer vision AI machine learning supervised reinforcement learning AI healthcare finance fraud detection AI autonomous self-driving AI ML DL NLP.

Conclusion:

AI artificial intelligence transformative technology AI ethics bias privacy AI responsible AI transparent AI explainable AI general AI quantum AI AI AI AI responsible transparent accountable fairness AI future AI AI AI AI artificial intelligence machine learning deep learning neural network.
